MANAGER

Simple Steps to **HAV** Compliance

The HAVi Manager

Here at the HAVi we believe The HAVi Manager is the easiest way to achieve compliance, both with the Control of Vibration at Work Regulations 2005 and the EU Physical Agents (Vibration) Directive 2002/44/EC.

The HAVi Manager is a simple step by step guide that takes you through HAV compliance and could easily be completed in half a day by one person!

It's that Simple...

The HAVi Manager consists of 3 key elements;

1. The System

Risk Tool Kit (Assess exposure compared to legal values) // Tool Inventory
Risk Elimination documentation // Risk Reduction and Control documentation
Training Presentation // Training DVD // The HAVi Manager documentation

2. The Control

HAVi Units // Havi Casings // Log Books

3. The Audit

Self Audit Procedure // Third party Audit Procedure (optional)

The HAVi Manager is available in three different formats; online (coming soon), PDF forms or paper based.

It's this Simple...
